Request Light	Sun
Leaf Status	Deciduous
Leaf Color	Green
Flowering Period	July
Flower Color	Multi colour
Fruit Color	Black/Brown

Hibiscus is deciduous, rounded-crown plant growing up to 2-3 m, and distributed to China and India. The leaves are 5-10 cm long with three lobes, and margins may be dentate. The gemmas and leaves are arranged on buds. The flowers bloom pink, white, red, purple from June to September. The genus is attractive with showy flowers. They like sunny or lighter shaded areas, and can be used as solitary in landscape.
