

Juniperus squamata blue star (CUPRESSACEAE)

Flaky Juniper, Single-seed Juniper Blue Star

Price	0.00 ₺
Category	Conifers
Sensitivity	-
Resistance to Cold	4A (-34.4_-31.7) °C
Heat Resistance	H4A (+38.0_+40.7) °C
Root Structure	taproot
Body Color	-
Soil Type	-
Durability	-
Plant Size	1-2 meters

Plant Growth	-
Autumn Color	Purple/Blue
Request Light	Half Shadow
Leaf Status	Evergreen
Leaf Color	Blue/Purple
Flowering Period	-
Flower Color	-
Fruit Color	Purple/Blue

Juniperus is a genus of shrubs or trees with needle-like leaves, widely distributed from North America to Central America, Europe, North and East Africa, Asia and Himalayas. Leaf color varies depending on the variety. The flowers bloom on petiole or at the tip of terminal buds. All varieties prefer open sunny locations and light soils. They grow slowly, however; they are resistant to gases, dust and frost. They are suitable for everywhere having plant soil. They are plants of light or light shade, and can be planted by the roadside.
