

Lagerstroemia indica vase shaped (LYTHRACEAE)

Crape myrtle, Crepe myrtle vase shaped

Price	0.00 ₺
Category	Bonsai & special
Sensitivity	-
Resistance to Cold	8A (-12.2_-9.5) °C
Heat Resistance	H5A (+43.6_+46.3) °C

Root Structure	Eaves rooted
Body Color	-
Soil Type	-
Durability	-
Plant Size	2-5 meters
Plant Growth	-
Autumn Color	Multi Color
Request Light	Sun, Half Shadow
Leaf Status	Deciduous
Leaf Color	Green
Flowering Period	August
Flower Color	Multi colour
Fruit Color	Black/Brown

Lagerstroemia is a genus of around 50 species of trees and shrubs native to Japan and China. The length of leaves varies from 2 to 8 cm long. Blooming period is generally long. The showy flowers exhibit themselves on terminal buds. The flowers are in color tones of pink, purple, white or red. Even in the defoliation season, it is also attractive with smooth and glossy, light brownish-pink bark. They grow slowly and become reddish in fall. They like sunny areas, and can be planted as solitary tree or as shrub in landscaping.
