

Pinus parviflora pentaphylla (PINACEAE)

Japanese white pine bonsai

Price	0.00 ₺
Category	Bonsai & special
Sensitivity	-
Resistance to Cold	4B (-31.6_-28.9) °C
Heat Resistance	H3A (+32.4_+35.1) °C
Root Structure	taproot
Body Color	-
Soil Type	-
Durability	-
Plant Size	2-5 meters
Plant Growth	-
Autumn Color	Multi Color
Request Light	Sun
Leaf Status	Evergreen
Leaf Color	Multi colour
Flowering Period	-
Flower Color	-
Fruit Color	-

They are evergreen plants growing up to 20-25 m. There are dwarf, semi-dwarf and tree species of Pinus. The leaves may be colorful depending on the species. There are two types of leaves: Scale leaves are single

and arranged spirally on the shoots. Scales leaves are lost two weeks later and replaced with 2, 3, and 5 (rarely 8) needle-type leaves on the buds or on the petioles. The bark gets thicker by age, and has deep grooves. There are some species tolerating to -40°C. They can be used as solitary.
