Root Structure	Eaves rooted
Body Color	-
Soil Type	-
Durability	-
Plant Size	5-10 meters

Plant Growth	-
Autumn Color	Yellow/Orange
Request Light	Sun
Leaf Status	Deciduous
Leaf Color	Green
Flowering Period	November
Flower Color	Multi colour
Fruit Color	Red/Pink

With about 430 species, Prunus is distributed to the north temperate regions of the world. Many of its species are planted for ornamental purposes and for their fruits. There are deciduous species of shrubs and trees. The leaves are simple and falcate; there is nectar on petioles. The flowers bloom red, white or pink in late winter or in early spring. Generally flowers and sometimes bark and leaves are used in landscaping projects.
