

Yucca elephantipes silver star (AGAVACEAE)

Curve Leaf Yucca, Pendulous, Weeping Yucca, Spanish Dagger, Moundlily Yucca, Soft Tipped Yucca silve

Price 0.00 ₺
Category Cactus
Sensitivity -
Resistance to Cold 9A (-6.6_-3.9) °C

Heat Resistance	H6B (+52.0_+54.7) °C
Root Structure	Eaves rooted
Body Color	-
Soil Type	-
Durability	-
Plant Size	2-5 meters
Plant Growth	-
Autumn Color	Multi Color
Request Light	Sun
Leaf Status	Evergreen
Leaf Color	Multi colour
Flowering Period	July
Flower Color	White/Cream/Grey
Fruit Color	-

Yucca is a genus of about 40-50 species of perennial evergreen shrubs or trees, natively distributed to North and Central America. They grow well in subtropical and temperate regions. The leaves are notable for tough, sword-shaped. In summer and autumn, the white or whitish-yellow flowers bloom in rosette form. They can be grown in any climate unless it is severe cold. It is attractive with its form. It can also be grown indoors.
